WEST CASTLE GROUP

CMMC Readiness & Contract Requirements

Understand what applies today and plan supplier conversations accordingly.

DEFENSE CONTRACTOR SECURITY

A business-first approach

On July 13, 2026, the Department of War announced a suspension of CMMC Phase II implementation requirements while Phase I self-assessment remains in place. Contract-specific requirements still matter. West Castle Group can help businesses evaluate security technology providers, not certify compliance.

WHAT THIS HELPS YOU EVALUATE

1 Assessment status

Check requirements for relevant systems and solicitations.

2 Documentation

Review security plans, policies, and remediation ownership.

3 System safeguards

Identify security controls requiring specialist input.

4 Supplier support

Explore managed security and technical assessment services.

WHEN TO START THE CONVERSATION

- A bid, renewal, or prime contractor asks about security readiness.
- Existing assessment records or documentation need review.
- The business needs managed security support to address identified gaps.

GOOD FIT

Defense contractors and suppliers evaluating applicable contract clauses, security assessments, and remediation work.

Review contractor security needs
